# Hydrogen Fuel Cell Cooling Solutions

## System overview

Continuous investment in innovative technology to address the ongoing environmental challenges faced by bus and coach operators worldwide, forms the basis for Grayson's clean vehicle vision and has resulted in numerous bespoke products, including the Hydrogen Fuel Cell Cooling system.

Carrying over the proven technology from combustion cooling products, the Grayson high efficiency heat exchanger and robust construction, provides a durable and reliable solution to meet market demands.

The introduction of Hydrogen Fuel Cell Technology in a developing transit market, has led Grayson to further enhance our product range by offering bespoke cooling solutions to suit your application requirements.

Grayson's unrivaled reputation for quality, innovation and for working in partnership with customers to develop bespoke solutions has seen them become the supplier of choice for some of the best-known OE manufacturers and vehicle operators in the world.

## Features & Benefits

- /// Bespoke Designed Solutions
- /// Brushless Electric Fans
- /// Lightweight, high efficiency heat exchanger
- /// Proven durability
- /// Market leading innovation
- /// Easy access for service & maintenance

**Production**  
in 4 manufacturing plants

**Specialists in**  
bus & truck, battery manufacturers  
& refuse vehicles

**Supported**  
with exceptional service

**Guaranteed**  
reliability

**Designed**  
with Grayson's  
extensive knowledge

**Adapts**  
to ambient conditions
