quality and service*

## **Grayson Fuel Tank Repair Centre**

### ***Is your Truck fuel tank leaking?***

*Are you looking for an efficient, fast, cost effective service that can put a new lease of life back into your old tank?*

Your fuel tank can be punctured, scraped, or damaged, causing rust and corrosion. Replacing it with a new factory supplied tank can be expensive, and time consuming.

### ***But Grayson can help...***

Commercial tanks lead a hard life, external damage to the tank and filler neck is a common problem. Internal and external corrosion can lead to seeping and eventually a major leak. We are experts when it comes to fuel tank repairs, stainless steel, steel or aluminium fuel tanks. Our experienced team have been repairing fuel tanks for over 30 years so you can trust us to do the job.

**As well as repairing the fuel tanks, we offer a remove, repair, re-fit service to ensure the work carried out is hassle free for all our customers.**

***Leaking fuel tanks are costly to the environment and your pocket...***

**■ Cost to operator   ■ Environmental Damage**
